

Creating an account

Once your Adctv Studio account is set up by the Account Servicing team, it will come with default settings. You can edit these settings as per your needs.

To begin running your campaigns, visit your Adctv domain and log in using your email ID and password.

On the Dashboard, go to the left-hand navigation bar and click on your name. Then, select User Profile. Here, you'll see your account details, such as Name and Email ID.

You can also add your Contact Number or update any of the information as needed.

Revision #2
